

## Life After Census

Belfast - 9 May 2012

# Beyond 2011

## The future of population statistics

Alistair Calder – Head of Stakeholder Engagement, ONS

# Beyond 2011 (England & Wales)

---

- Context - why change?
- Statistical options – what are the alternatives?
- Research plans & the (long) timescale
- Risks & Issues – what could possibly go wrong?

# **Beyond 2011**

The context and background

Why bother to change ?

# Context

---

- Census – every 10 years
  - Population statistics → small areas
  - Social conditions → +
  - Housing → multivariate combinations
- Uses: Resource allocation
  - Service planning
  - Policy development, monitoring and review
  - Social research
- EU regulations and duty to report to Parliament

# The Beyond 2011 Programme

---

- Why change? – Why look beyond 2011?

  - Rapidly changing society

  - Evolving user requirements

  - New opportunities – data sharing

  - Traditional census – costly and infrequent??

- UK Statistics Authority to Minister for Cabinet Office

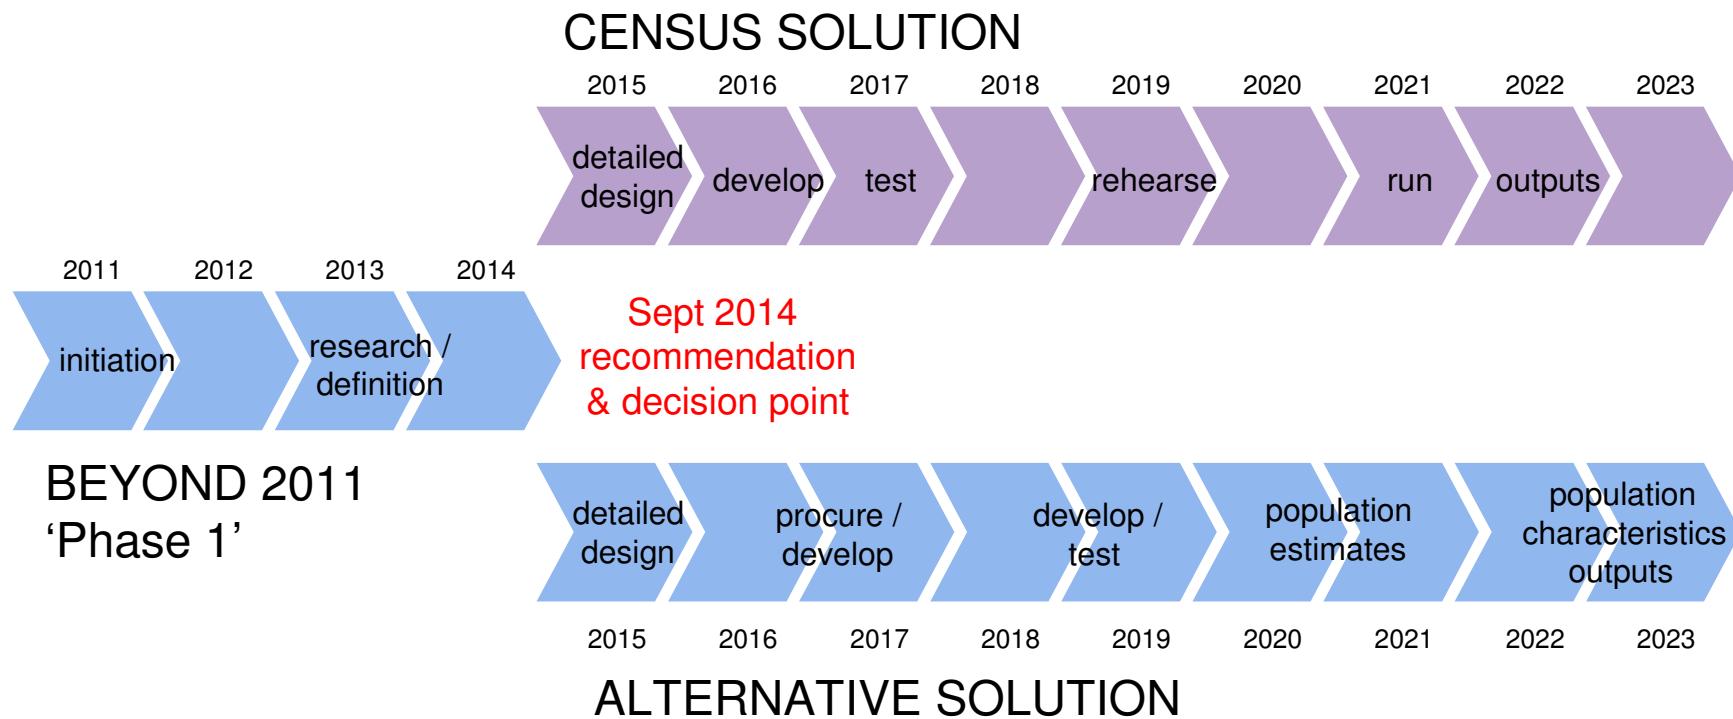

*“As a Board we have been concerned about the increasing costs and difficulties of traditional Census-taking. We have therefore already instructed the ONS to work urgently on the alternatives, with the intention that the 2011 Census will be the last of its kind.”*

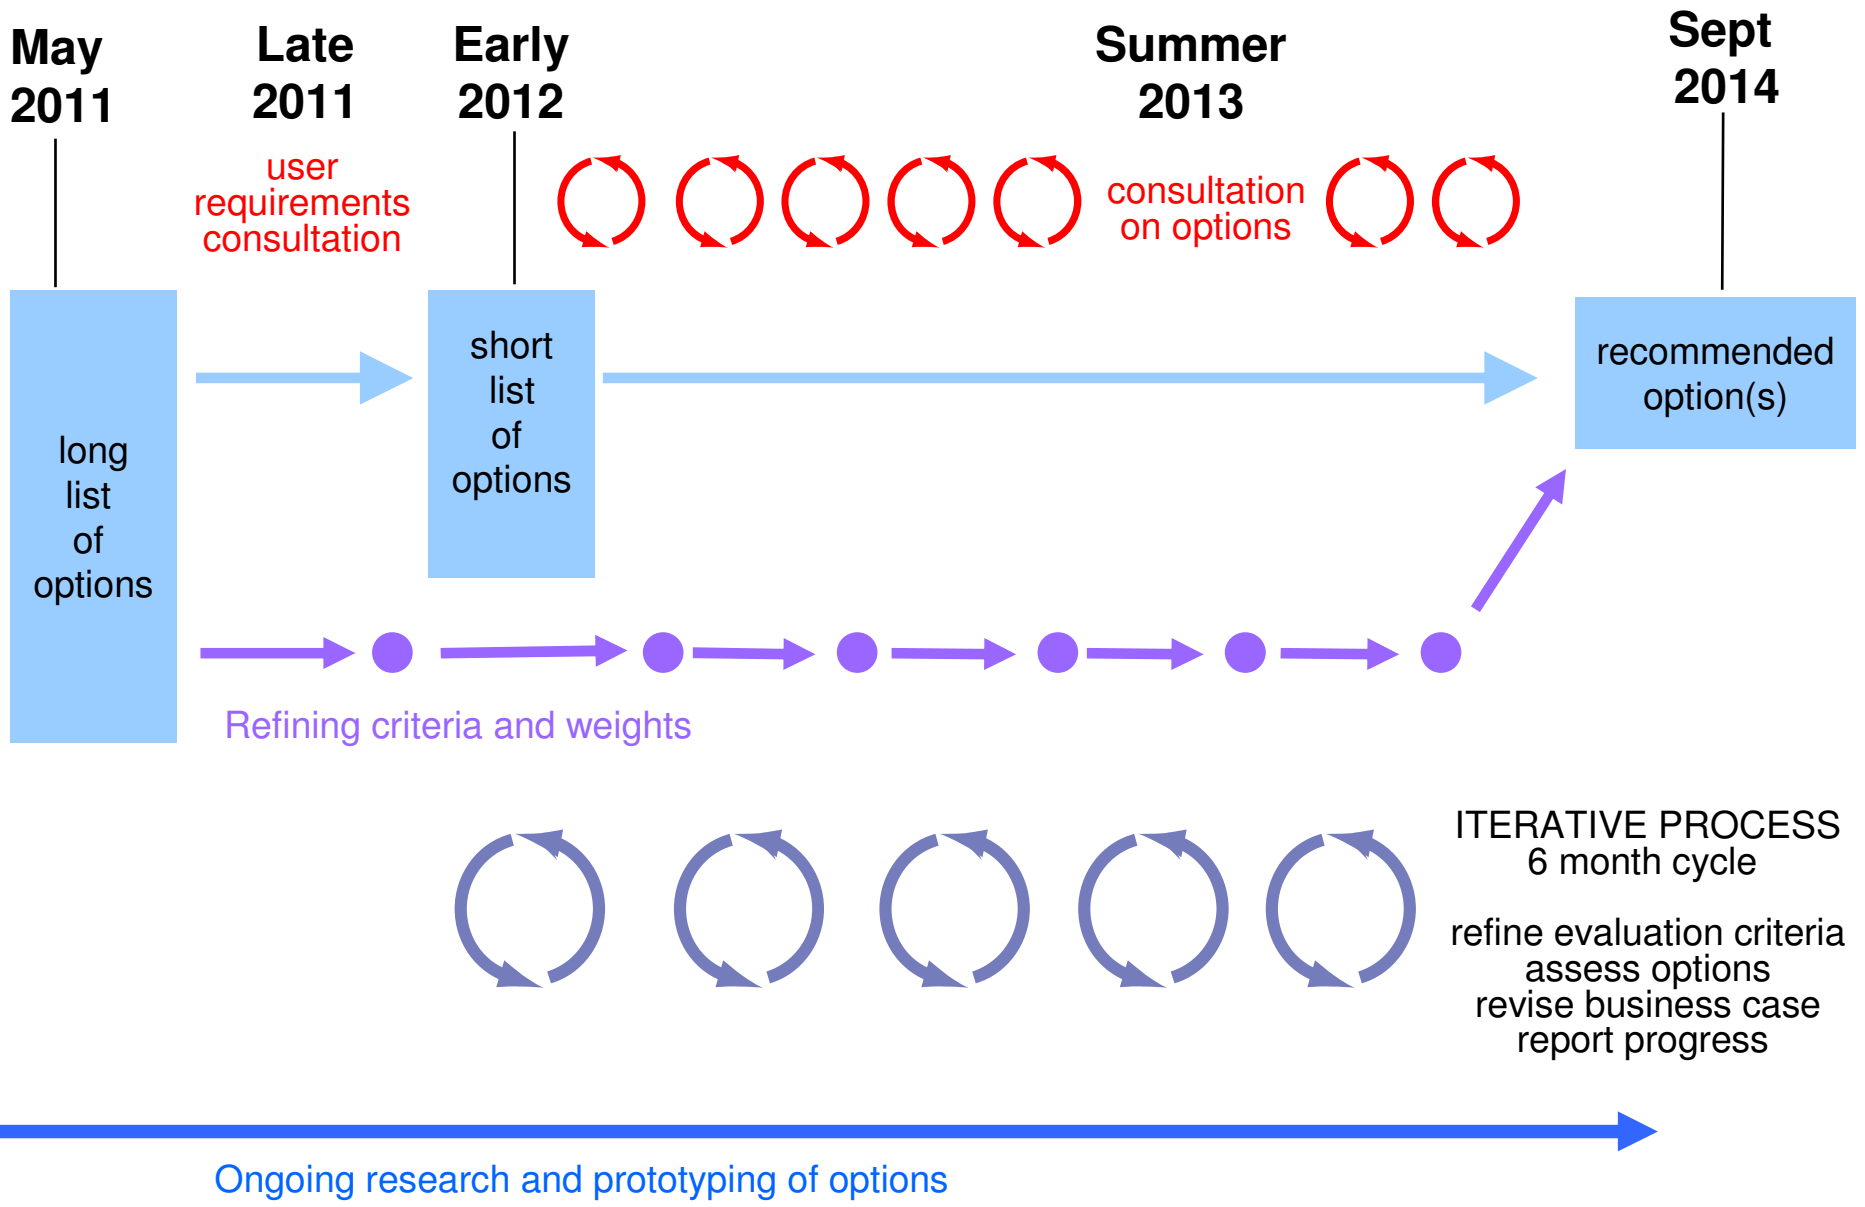

# Programme Purpose

---

- Identify the best way to provide small area population and socio-demographic statistics in future
- Provide a recommendation in September 2014
  - underpinned by full cost-benefit analysis
  - & high level design for implementation
- (subject to agreement) **Implement the recommendation**

# Beyond 2011 - Timeline - the key decision

# **Beyond 2011**

## Statistical Options

# Beyond 2011 : Statistical options

Census options

- Traditional Census (long form to everyone)
- Rolling Census (over 5/10 year period)
- Short Form (everyone), Long form (Sample)
- Short Form + Annual Survey (US model)

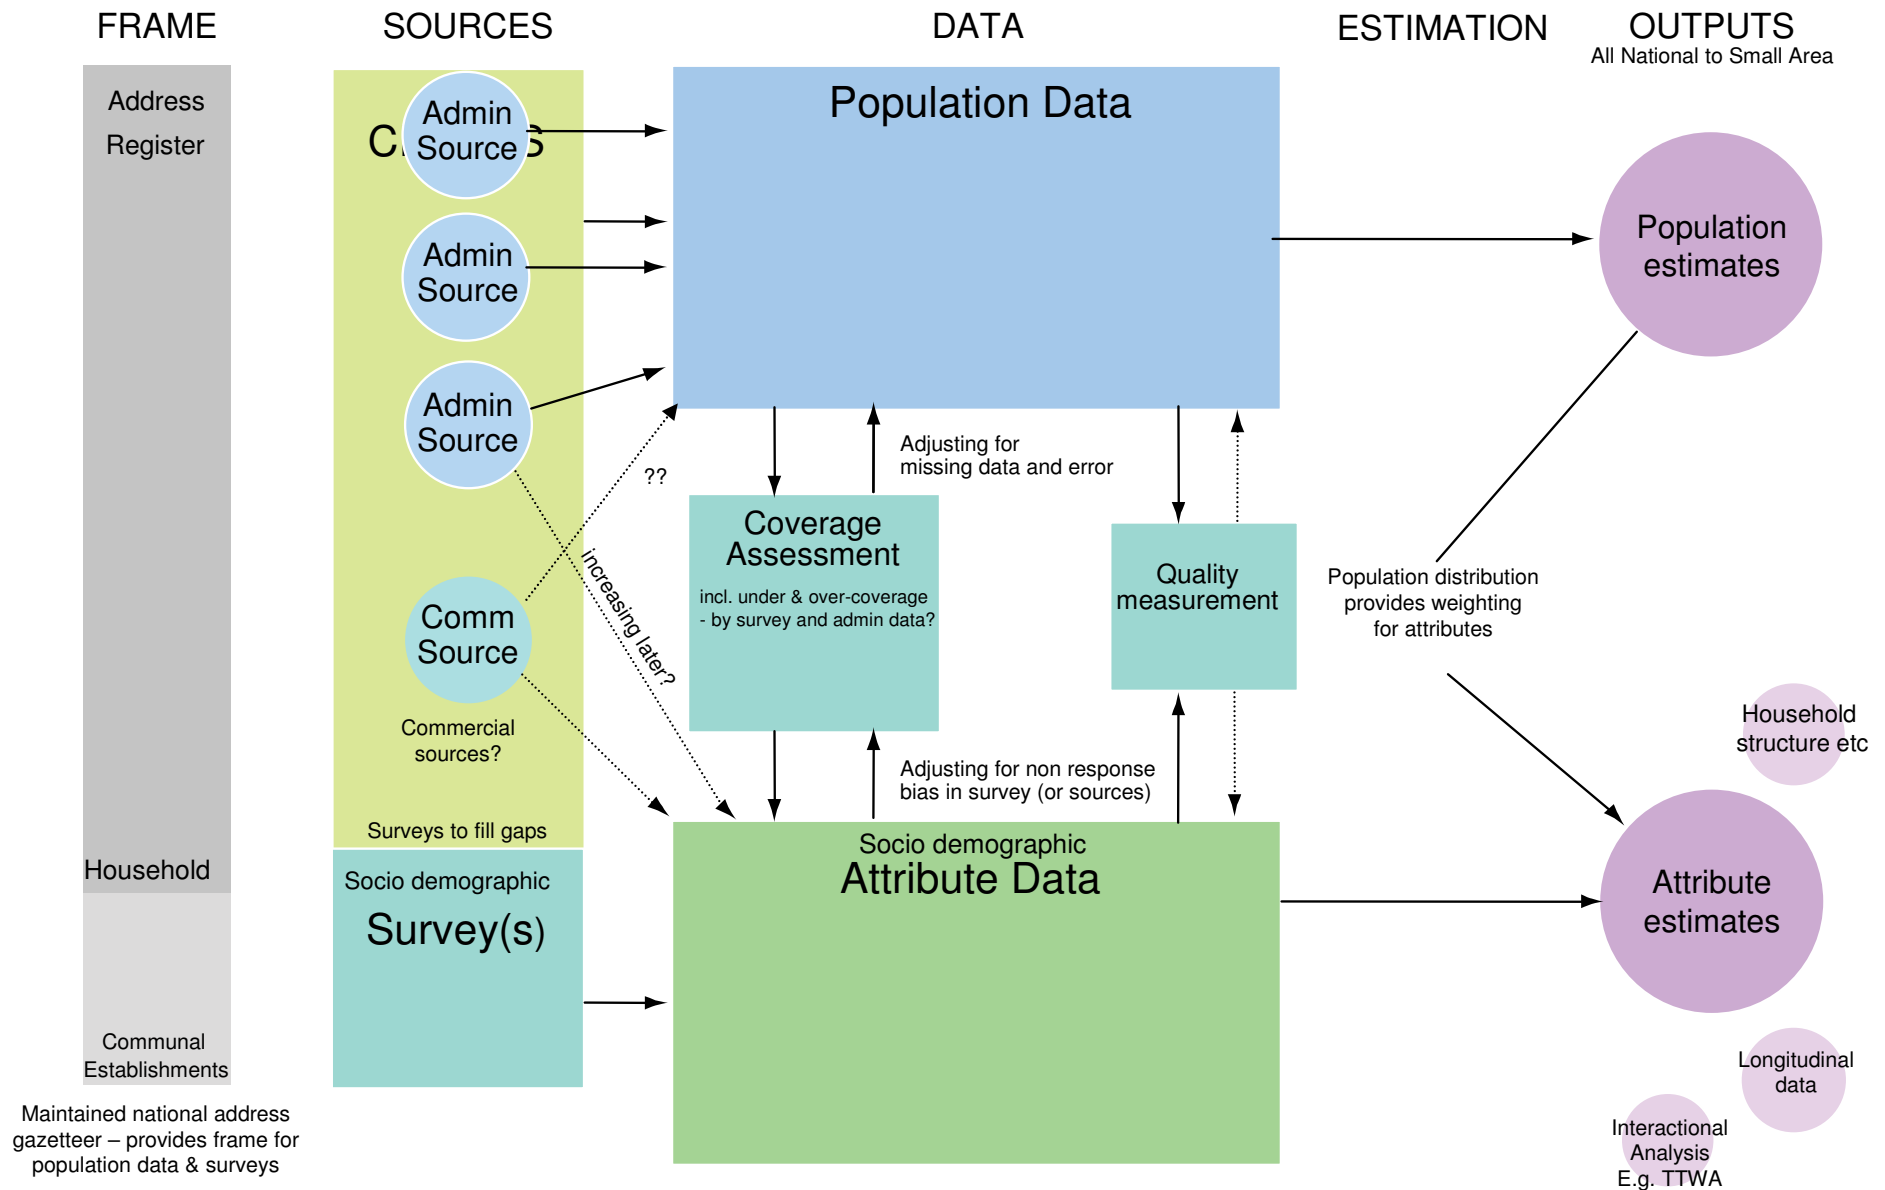

Administrative data options

- Aggregate analysis
- (Intermediate) Sample linkage e.g. 1% of postcodes
- 100% linkage to create 'statistical population spine'

Survey option(s)

- Address register + Survey

# Beyond 2011 – statistical options

# Potential data sources

---

- Population data
  - NHS Patient Register
  - DWP/HMRC Customer Information System
  - Electoral roll (> 18 yrs)
  - School Census (5-16 yrs)
  - Higher Education Statistics Agency data (Students)
  - Birth and Death registrations
  - DVLA?
- Socio-demographic sources
  - Surveys
  - DVLA?
  - Commercial sources?
  - Utilities?
  - TV licensing?

# Comparing Administrative Data Sources

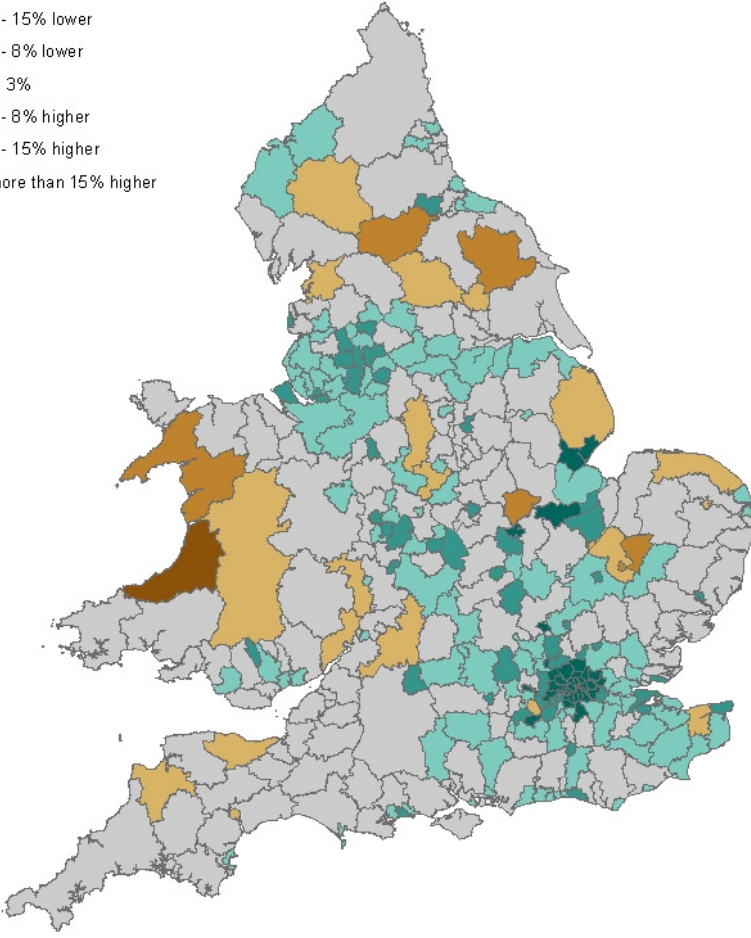

Differences between population counts from the 2010 DWP CIS and ONS Mid Year Estimates 2010

## Totals for all age groups

Percentage Difference  
(MYE is base)

-  CIS more than 15% lower
-  CIS 8 - 15% lower
-  CIS 3 - 8% lower
-  Within 3%
-  CIS 3 - 8% higher
-  CIS 8 - 15% higher
-  CIS more than 15% higher

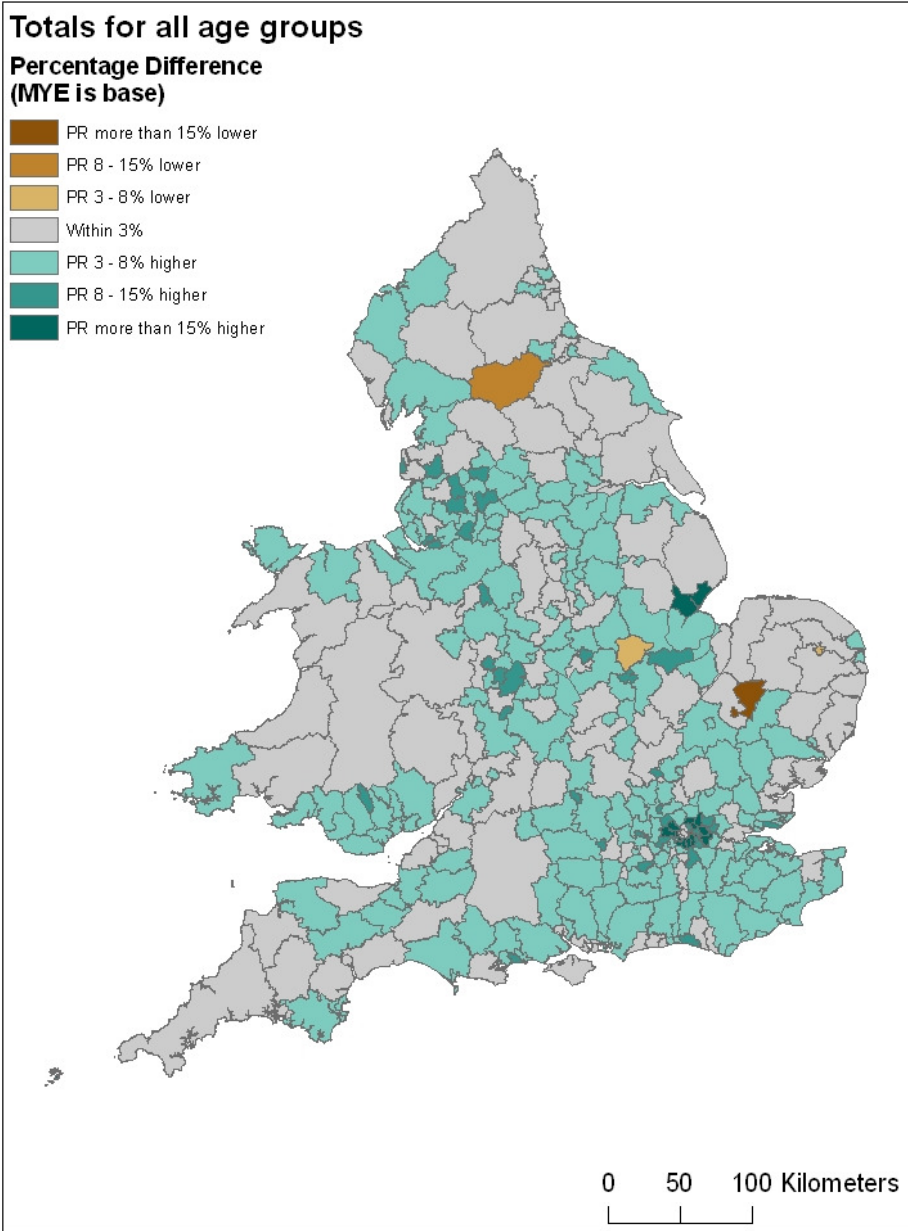

0 50 100 Kilometers

DWP CIS population counts compared with ONS Mid Year population estimates

# Comparing Administrative Data Sources

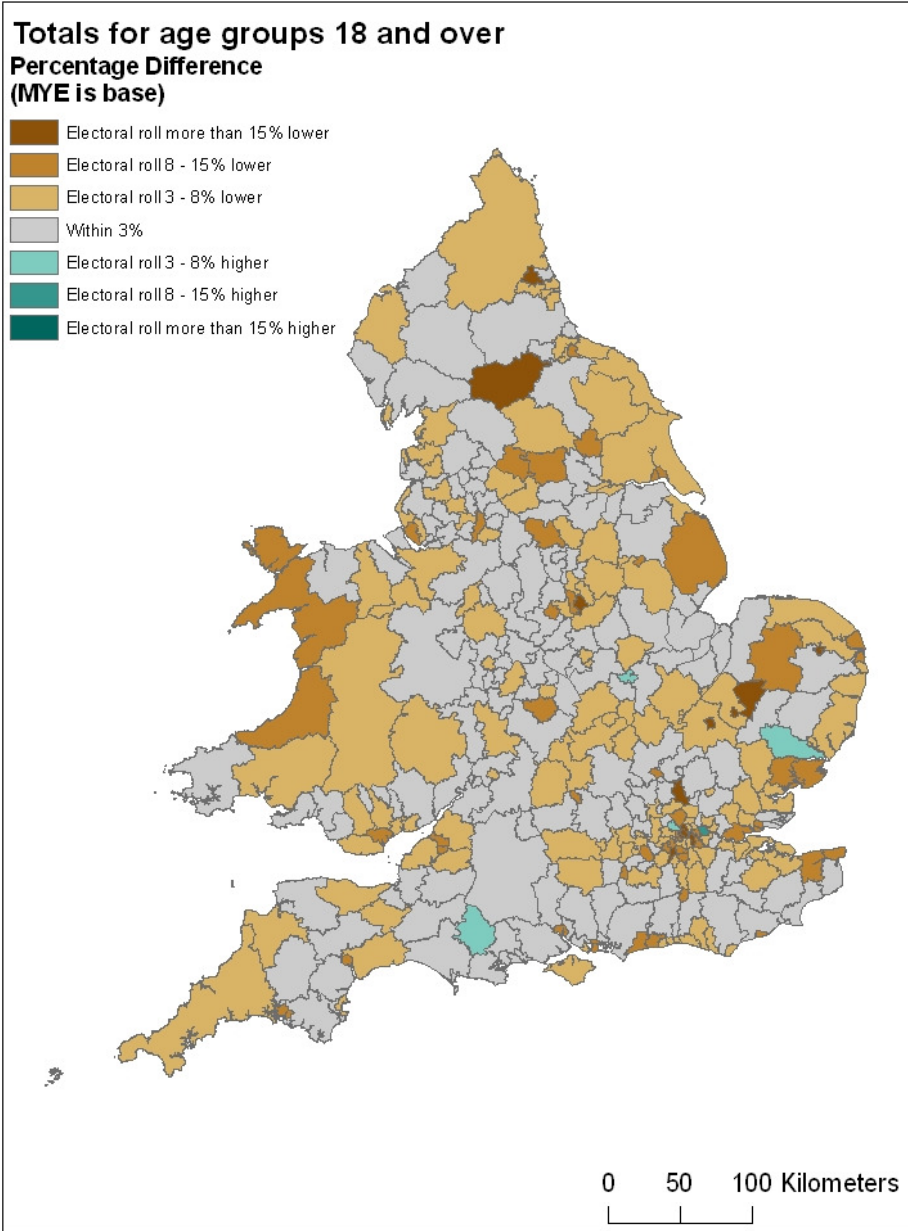

Differences between population counts from the 2010 Patient Register and ONS Mid Year Estimates 2010

Patient Register population counts compared with ONS Mid Year population estimates

# Comparing Administrative Data Sources

Differences between population counts from the 2010 Electoral Roll and the Mid Year Estimates 2010

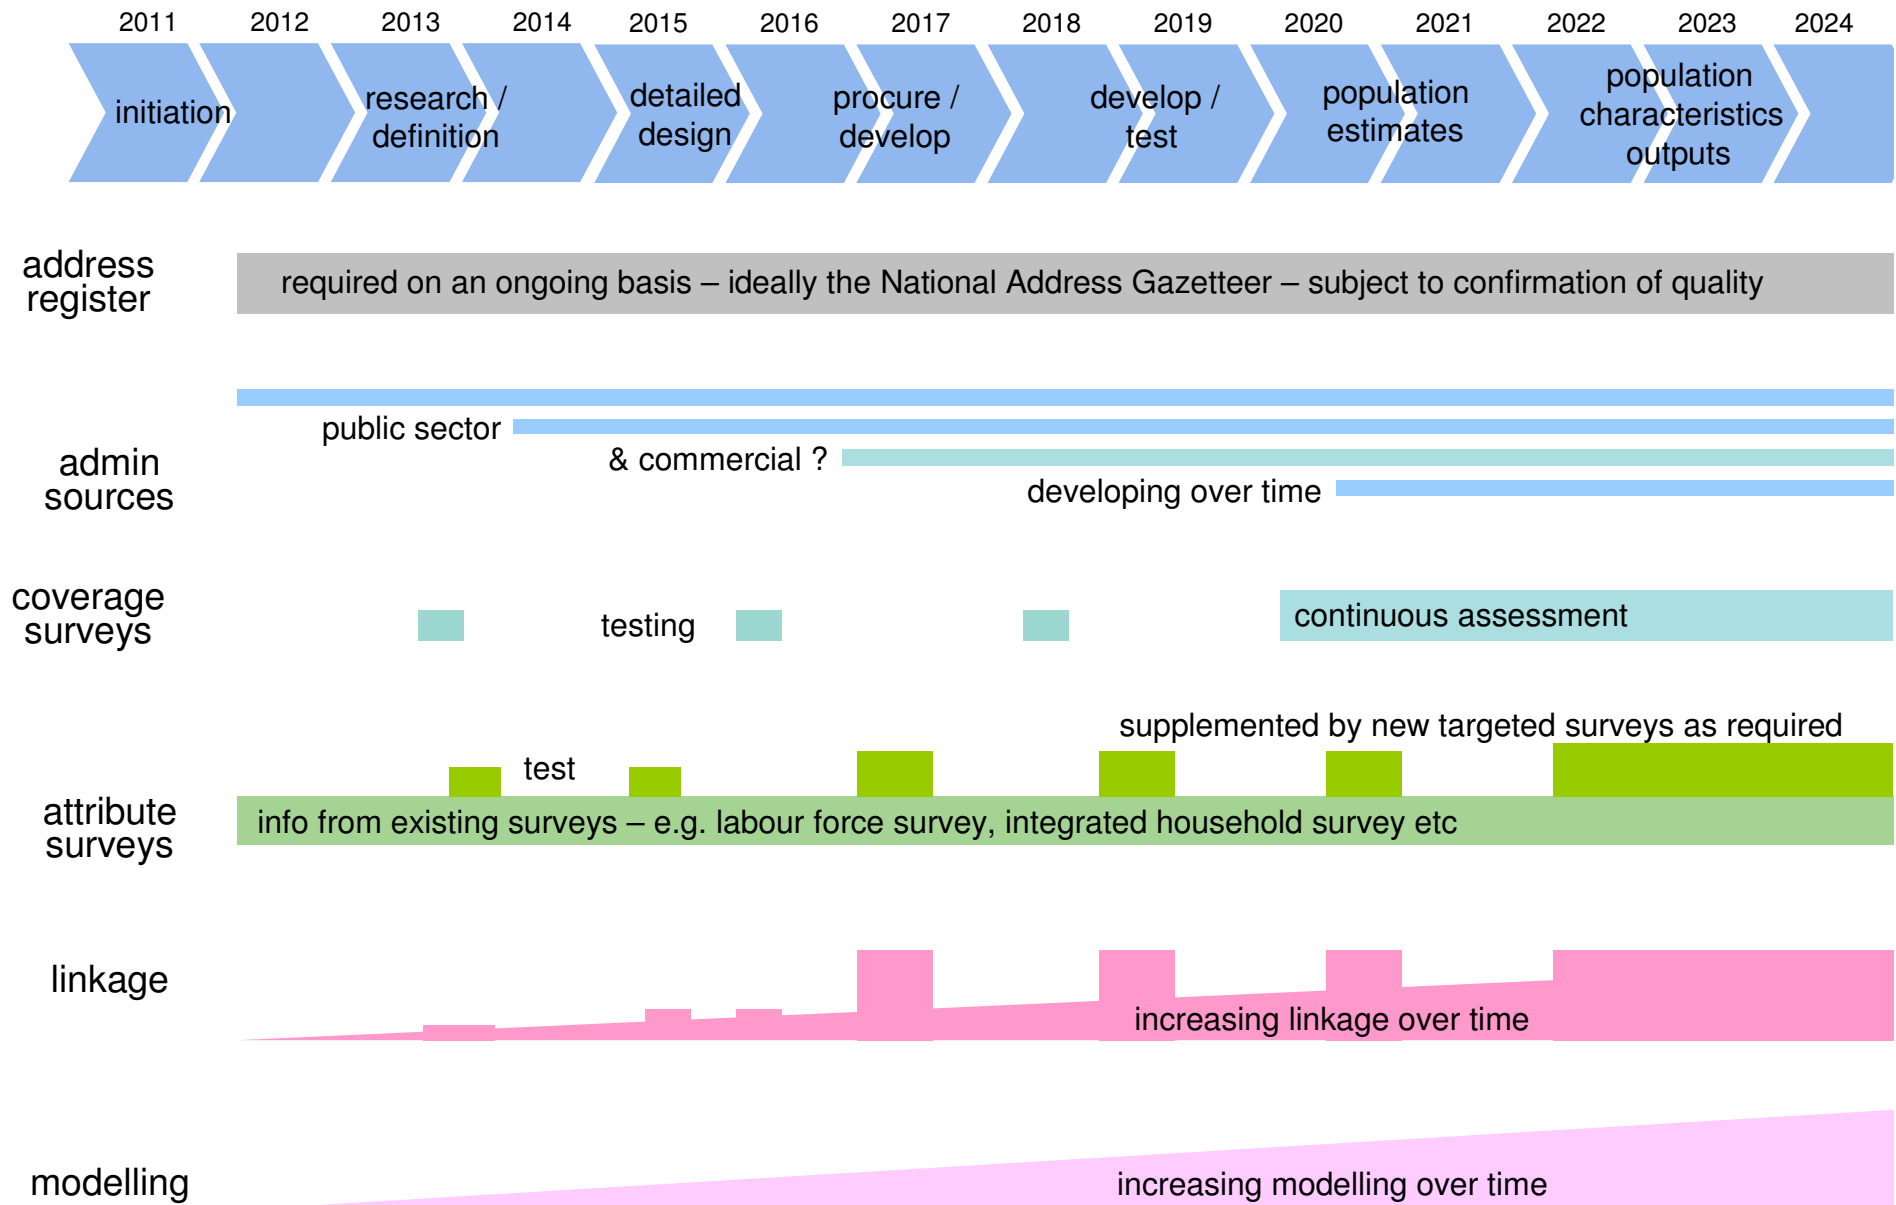

Electoral Roll population counts compared with ONS Mid Year population estimates

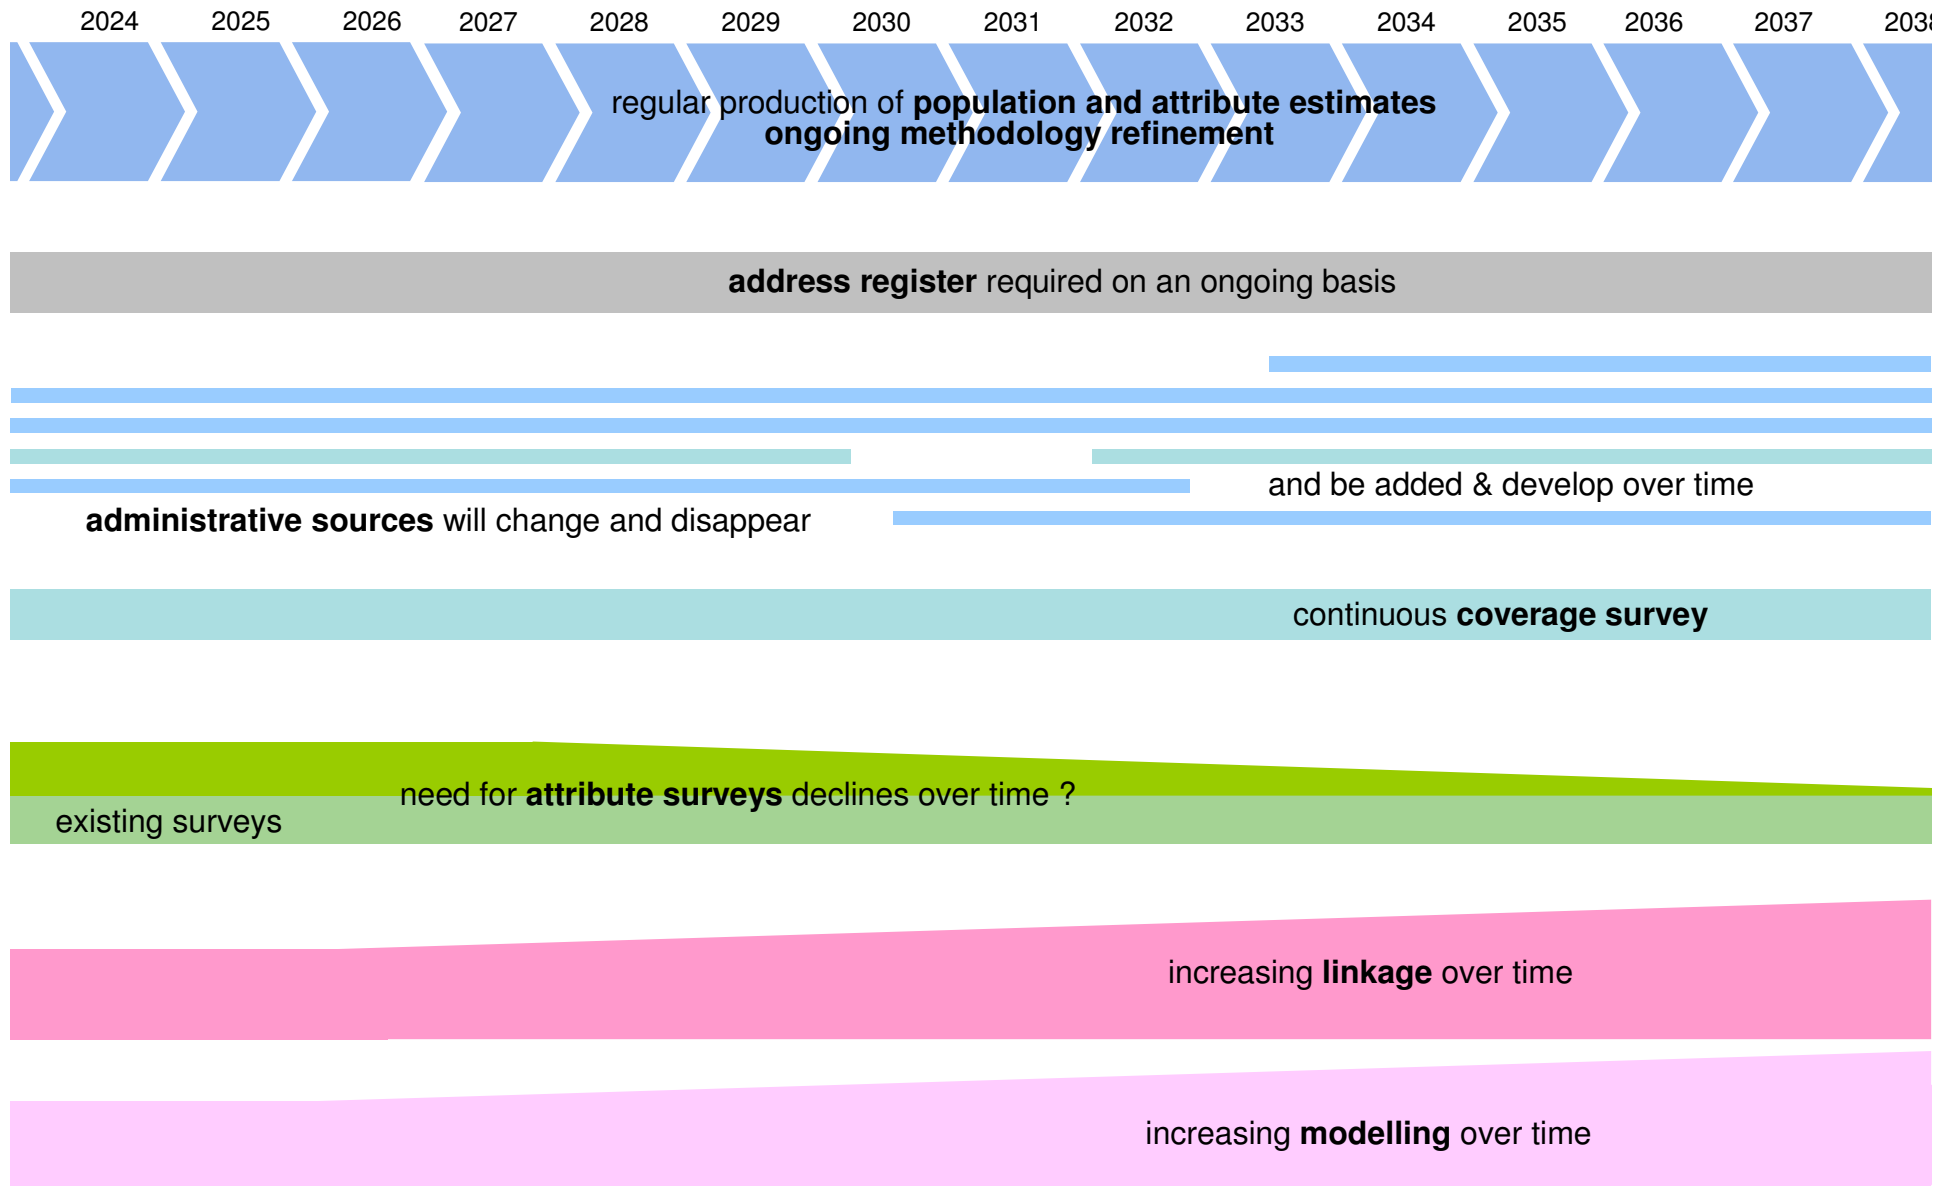

# **Beyond 2011**

Timeline – Plans and the Future

# Beyond 2011 - Timeline (non census solution)

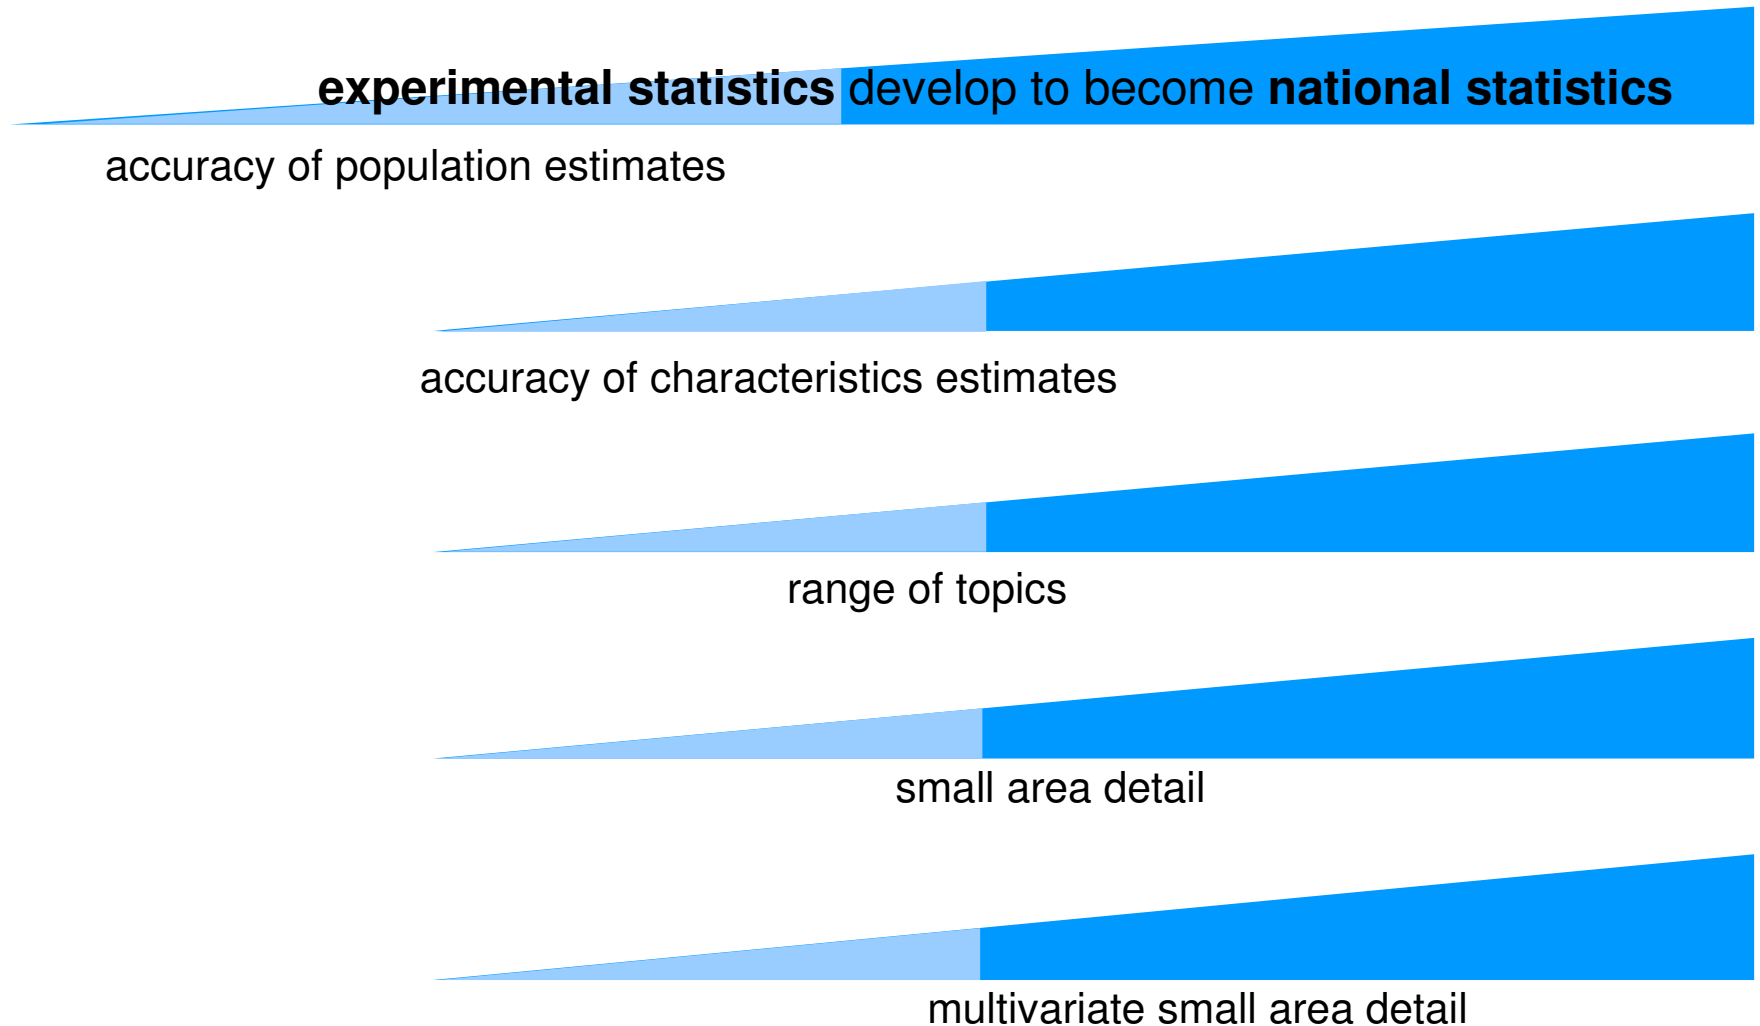

# Beyond 2011 - and into the future

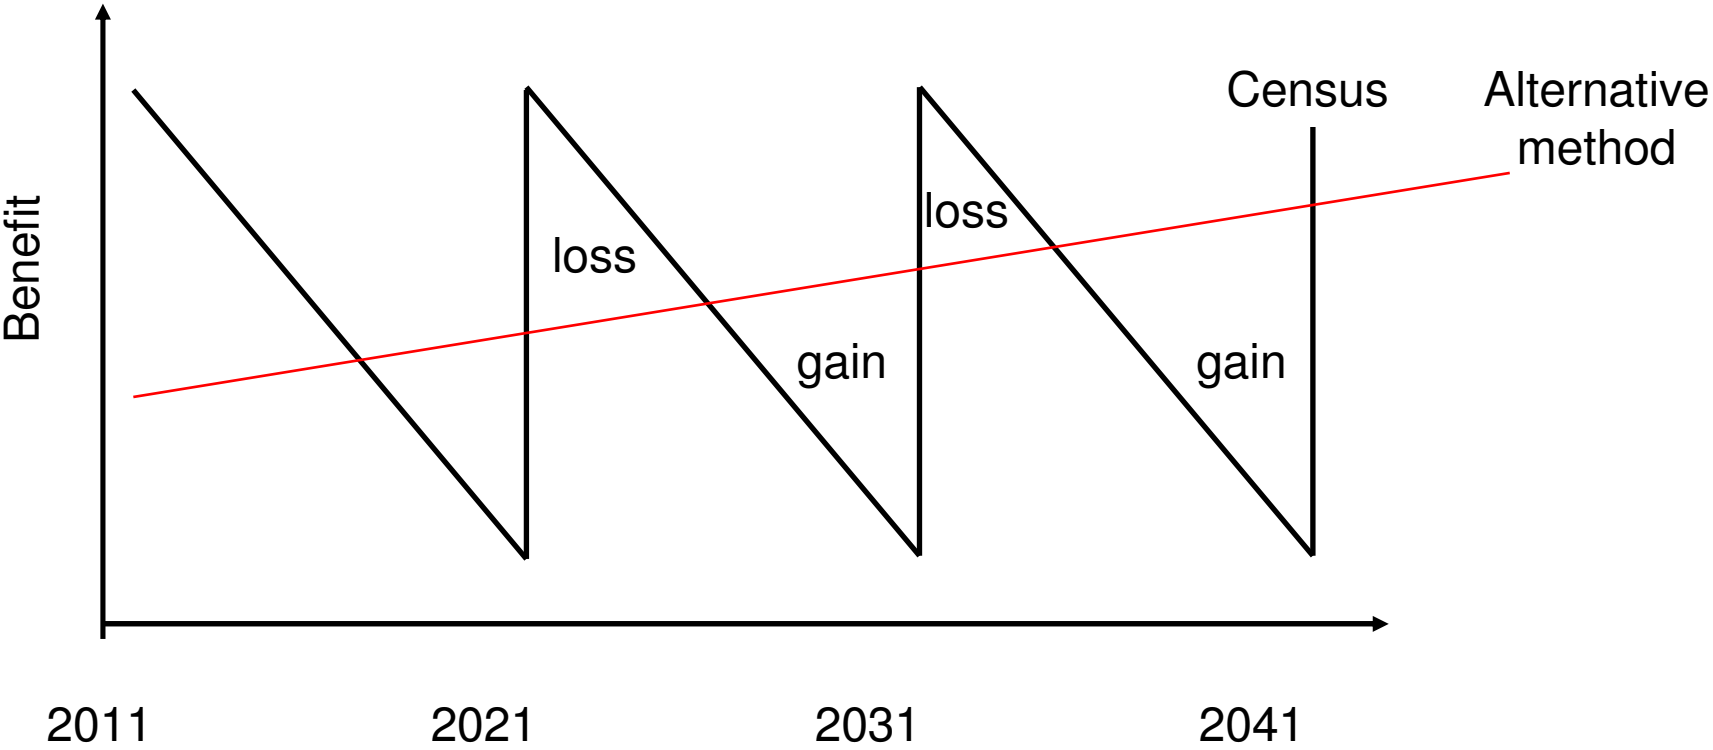

# Improving quality & quantity

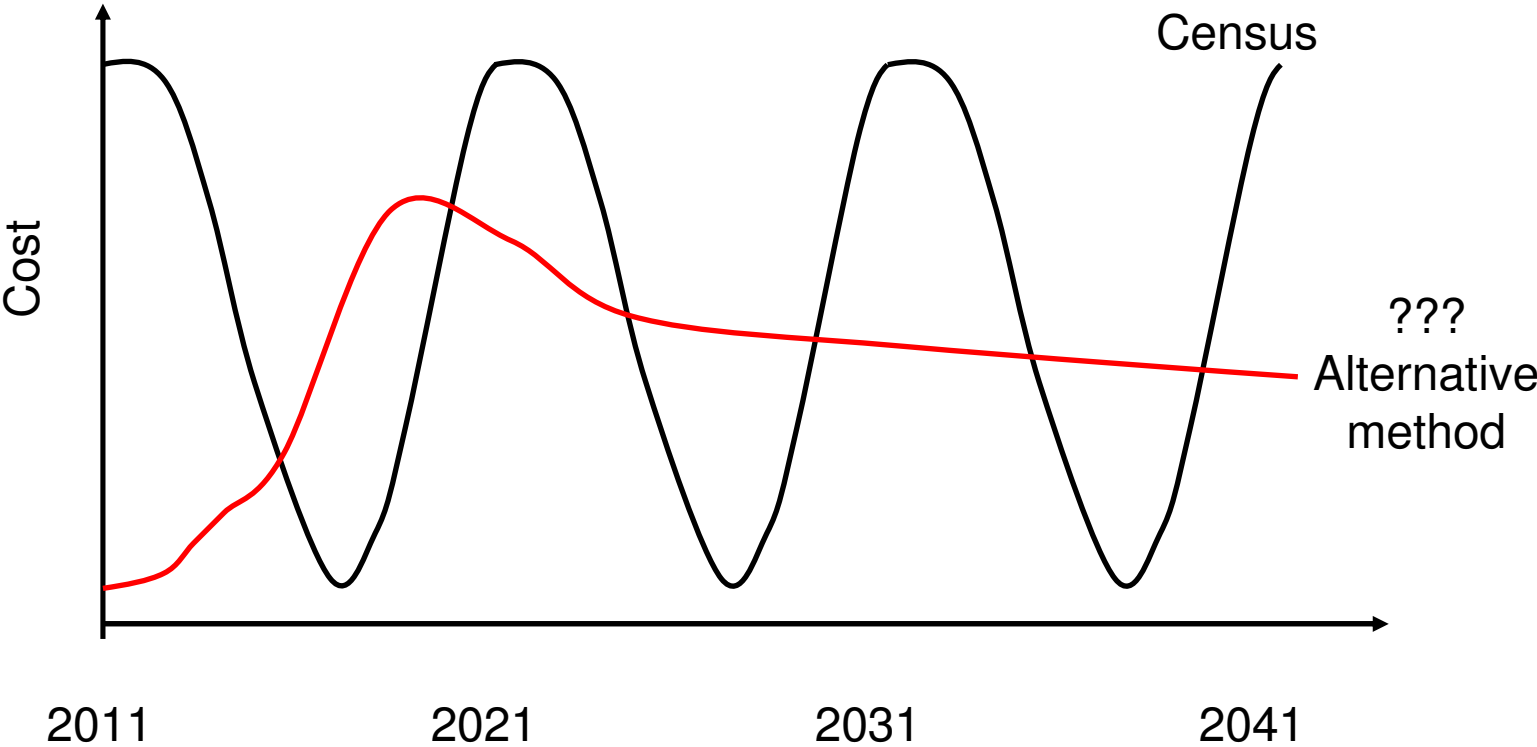

2013 → 2021 → 2031

# Statistical benefit profile

# Cost profile (real terms)

# **Beyond 2011**

## **Research Plan**

**- Overview / Some early observations**

# Beyond 2011 : Statistical options

Census options

- Traditional Census (long form to everyone)
- Rolling Census (over 5/10 year period)
- Short Form (everyone), Long form (Sample)
- Short Form + Annual Survey (US model)

Administrative data options

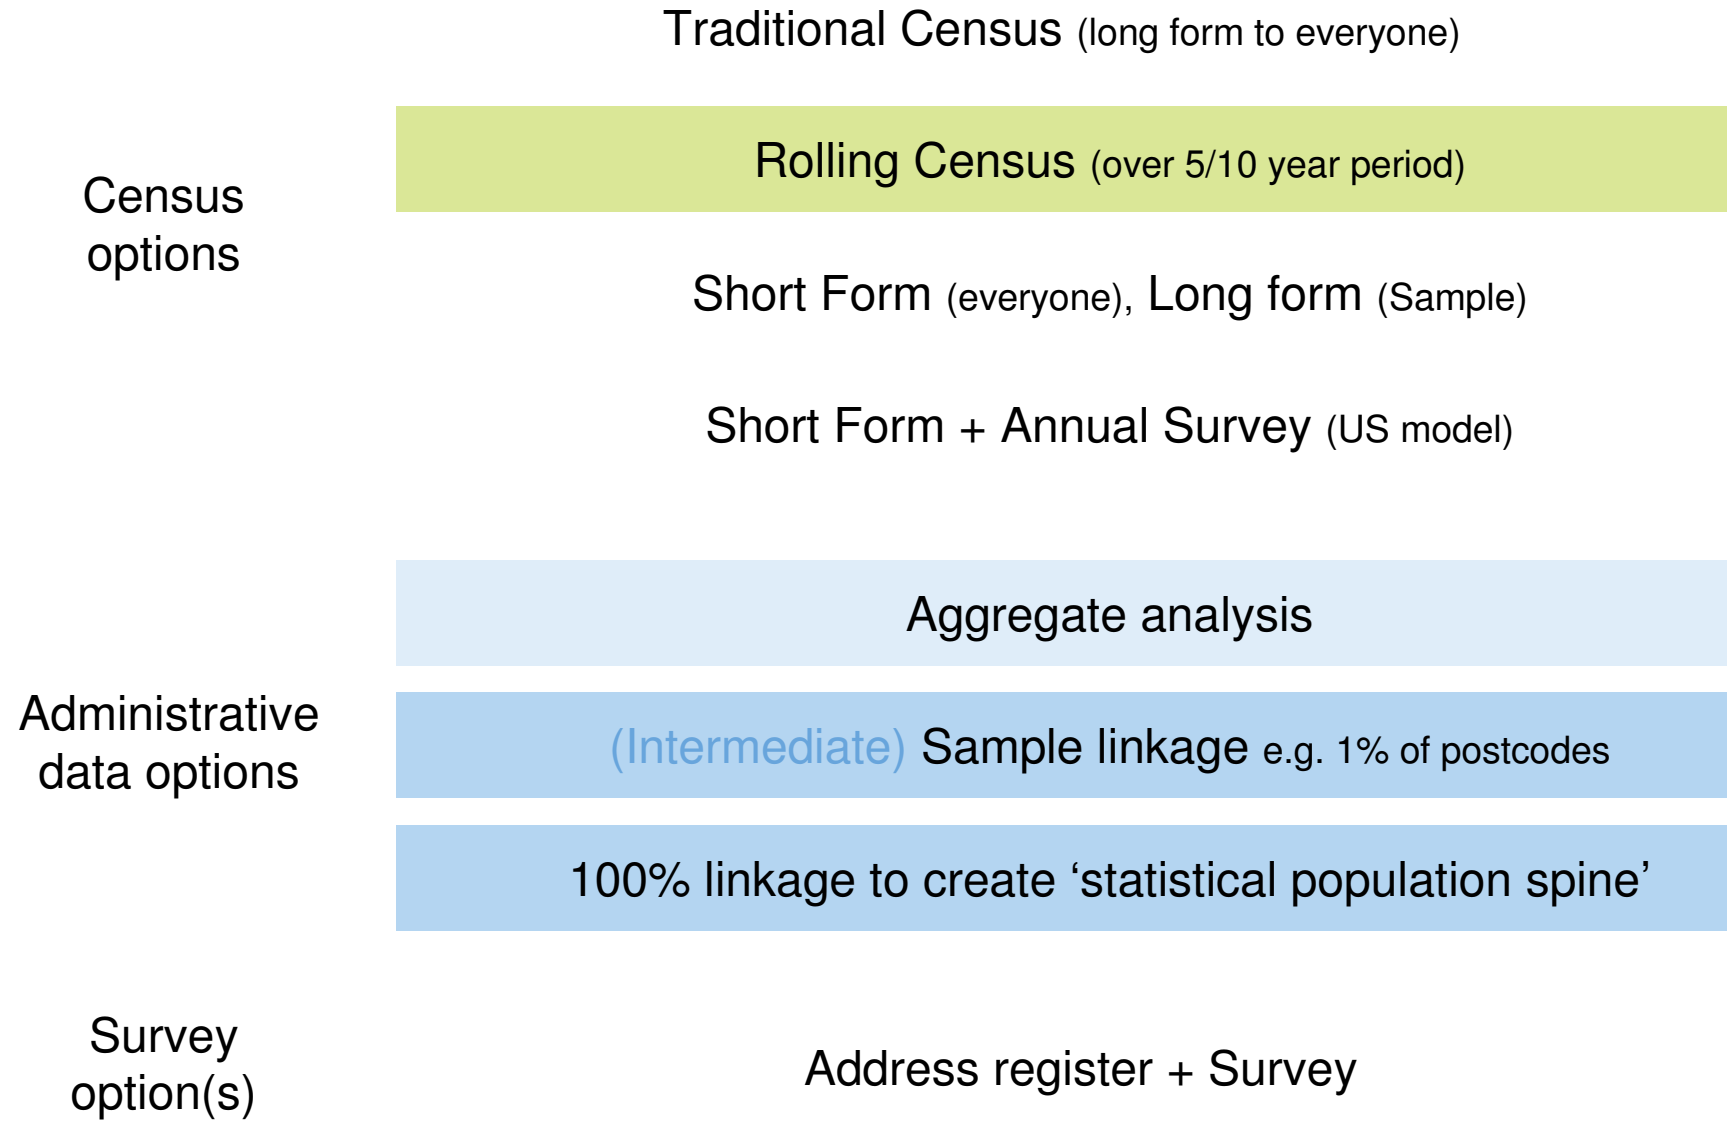

- Aggregate analysis
- (Intermediate) Sample linkage e.g. 1% of postcodes
- 100% linkage to create 'statistical population spine'

Survey option(s)

- Address register + Survey

# Beyond 2011 : Statistical options

# Research and Testing Strategy - overview

---

- Regular trial estimates
- Key evaluation against 2011 Census results
- Use 2011 Census Coverage Survey (CCS) and administrative sources to test models
- Link 2001/2011 CCS to admin sources to produce trial population estimates
  - Similar methodology to Census coverage adjustment
  - Trial with a single administrative source – and add other sources incrementally to model to assess quality gains
- Assessing options for coverage survey and socio-demographic survey – field trials later
- Looking at all available sources – including commercial sources
- Discussion with stakeholders – incl debate on criteria

# Criteria?

---

- **Cost** (both total cost and cost profile over time) & **benefit**
- Fitness for purpose i.e. ability to meet user requirements
  - Accuracy of the statistics produced
  - Frequency of the outputs e.g. updated annually, or every 5 or 10 years
  - Geographic level at which outputs can be produced e.g. local authorities, output areas
  - Consistency and comparability of the outputs across geographic areas
- Technical & legal feasibility
- Risk
- Public burden and public acceptability.

(eg. census accuracy)  
**ACCURACY**

**FREQUENCY**  
(eg. annually)

**GEOGRAPHY**  
(eg. output areas)

# Beyond 2011

Key risks and issues

What could possibly go wrong?

# Key risks of non census alternatives

---

- **Public opinion**  
Public acceptability research, open consultation & transparency of approach
- **Technical challenge – cutting edge & a big change**  
Building high quality team, talking to experts and strong external assurance
- **Changes in administrative datasets**  
Building resilient solutions – but may need legislation
- **Ensuring decision making – getting political buy-in**  
This is a big decision – needs real commitment
- **Devolved issues / harmonisation of UK outputs**  
Establishment of UK Beyond 2011 Committee + NS / RGs agreement

# Programme Principles

---

- Open, innovative, high quality research
- Ongoing dialogue with users and other stakeholders
- Clear, published criteria – refined over time
- Iterative assessment of options and business case
- Extensive independent assurance
