November 2003

In alphabetical order

M. Carey and Y. E. Ge
School of Business and Management, Queen’s University Belfast

dynamic traffic assignment framework. Proceedings of IEEE Intelligent Transportation Systems

2. Abdelfatah, AS, Mahmassani, HS (1998) System optimal time-dependent path assignment and
signal timing in traffic network. Transportation Research Record 1645, 185-193.

transportation networks. Transportation Research Record 1771, 52-60.

assignment in design and evaluation of high-occupancy toll lanes. Transportation Research Record

assignment and path-based signal coordination: Application to network traffic management.
Transportation Research Record 1667, 67-76.

34B, 515-531.

Transportation Science 35, 389-404.

bottlenecks, including a paradox and metering. Transportation Science 27, 148-160.

commute. Transportation Research 24B, 209-228.

Computer Modelling 35, 643-656.

dynamic network loading. Transportation Research Record 1771: Transportation Network Modeling,
179-190.

routing at airports. Transportation Research Record 1788: Aviation: Airport and Air Traffic
Economic and Operational Issues, 70-75.

178. Logie, M (1992) Assignment modeling with dynamic traffic effects. Proceedings of the 4th International Conference on Microcomputers in Transportation (code 18379),
