

Denise Price

Research Centre Business Manager

Denise Price

B.Eng. in Civil Engineering from Queen's University Belfast

Denise studied Civil Engineering at QUB which included a summer placements with the Royal Naval Engineering College in Plymouth and Roads Service in NI. She spent the first half of her professional career as an engineer working in a firm of consulting civil and structural engineers primarily involved in feasibility studies and the design and supervision of the construction of various water network and sewerage system infrastructure projects. During this period she became a Chartered Engineer through the Institution of Civil Engineers and a member of the Chartered Institution of Water and Environmental Management (CIWEM) and is currently the NI Chair of CIWEM. The latter half of her career to date has been spent as the Business Manager of the Polymer Processing Research Centre, a self-financing Centre in the School of Mechanical & Aerospace Engineering at QUB which undertakes leading edge, industrially exploitable, fundamental and applied R&D and serves a central supporting role to the research undertaken in the Advanced Materials & Processing Research Cluster in the School. As the School's Scientific Academic Women's Network (SWAN) Champion, Denise is working with a team of others in the School to support and advance women's careers in science, technology, engineering, maths and medicine employment in academia.

'Dare to be different'
