

Rochelle O'Hara

Projects Director - STEM Enthusiast

Rochelle O'Hara

2010 - PhD in Biomaterials, Mechanical and Aerospace Engineering, Queen's University Belfast

2007 - BSc Hons Biomedical Engineering, graduated with First Class Honors and Diploma in Industrial Studies, Faculty of Engineering, University of Ulster

My current role is as a Projects Director for Sentinus, where I am responsible for the creation, management and effective delivery of projects focused on Science, Technology, Engineering and Mathematics (STEM) enrichment and enhancement activities tailored to primary and post primary schools in Northern Ireland.

My job affords me pretty much the perfect balance between office work, for which I do planning, and management preparation of projects, and field work which involves the recruitment of Sentinus Ambassadors and delivering programmes in schools which will engage and enthuse young people about STEM.

"Education is the most powerful weapon which you can use to change the world".

-Nelson Mandela
