

All content for presentation on Waterfront projection screens should be prepared with these guidelines in mind.

MICROSOFT POWERPOINT

Powerpoint 2003 – 2013 files. 16:9 aspect ratio presentations. Embedded video for Powerpoint 2013/365. Video files as either Quicktime friendly mp4 H.264 codec or WMV for earlier Powerpoint versions. Files must come in a folder also containing said video files with correct linking to presentation. All text content should be inside title-safe guides (approx. 20 pixels inside slide edge).

STAND ALONE VIDEO FILES.

MP4, AVI or MKV container of H.264 or XVID codec. Aspect ratio of 16:9 with advised minimum resolution of 1280 x 720. Suggested bandwidth between 3Mb/sec – 7Mb/sec. Specially prepared files should include a start and end one second silent black slug. All text content should be inside title-safe guides (approx. 20 pixels inside image edge).

Hall 1A/1B (Plenary and MCF):

For full use of the Main Auditorium 12m x 6m screen without 16:9 masking: This content should be either rendered at a 2:1 aspect ratio or in a standard 16:9 aspect with letterbox blanking to a 2:1 aspect. All text content should be inside a 20 pixel margin of this 2:1 image field. For information on more specialized video/film presentations and any further details on presentation requirements contact

PDF and Keynote

Note: PDF and Keynote presentations can also be accommodated, but where possible PowerPoint presentations are preferred by Waterfront Exhibition centre for ease of transition between talks via their centralised upload system. If PDF or Keynote is a must, please prepare your oral presentation with the above guidelines.

For further information please contact the local organising committee via eps2017@qub.ac.uk
