UNIVERSITY  
BELFAST**

## Sustainability Budget

The Sustainability Team are supported with an allocated budget that covers both the implementation of the sustainability initiatives and the resourcing of the staff team. The financial budget sits within the Estates Directorate.

Over the academic year 2021 – 2022, the University has committed to investing £1 million in sustainability and carbon reduction, funded by grants from Salix and University funding. This includes investment in the creation of a new Sustainability team within the Estates Directorate, funding for a range of carbon reduction, sustainable travel, engagement and biodiversity initiatives.

Sustainability is embedded within one of the key Strategic Priorities 'Social and Civic Responsibility and Economic Prosperity', which include a commitment to embrace the Sustainable Development Goals across our University activities and a commitment to transition to a carbon neutral society.
