

# **ULT FREEZERS**

One Queen's ULT Freezer uses an average of **14kWh per day**- that's equivalent to making **552 cups of tea!**

Keep your samples safe- **defrost regularly**

Freezer space costs money. Remove excess samples to reduce the need for additional freezers.

Turning freezers up by 10°C (from -80°C to -70°C) can save between 30-40% more energy

Defrost annually for long-term storage and more often for those in constant use to keep ice to a minimum.
