POSTGRADUATE CERTIFICATE IN SOFTWARE DEVELOPMENT

If you have been furloughed or made redundant as a result of the COVID-19 pandemic, you may understandably be feeling uncertain about your future.

Using this time to acquire in-demand coding skills could be the ace up your sleeve when you do return to the workforce.

This free course is fully funded by the Department for the Economy to upskill and retrain individuals with no prior qualifications in coding or computer science.

Got questions or would like to find out more on the course? Hear from Aidan McGowan, the Course Director and Darryl Stewart, Director of Postgraduate Computing on our webinar, Tuesday 12 May at 3pm.

THE COURSE

This flexible online course starting on 8 June 2020 provides an opportunity to upskill in key technology areas including programming, testing and computing foundations, enabling you to advance your career across multiple industries from engineering to manufacturing and finance.

WHY CHOOSE THIS COURSE?

Whether you want to stay ahead of the talent curve in your current role or

you're looking for a career changing stepping stone into our part-time Master's in Software Development, a strong foundation in coding and computing can help you stay professionally relevant.

- Commencing 8 June 2020 and with a possible completion date from September 2020
- Awarded a **PgCert in Software Development**
- Option to progress directly into Year 2 of study on the full **MSc in Software Development**, working towards completion of the masters in Sept 2021
- Our graduates are employed by some of the largest companies on the planet, including IBM, Citi, Allstate and Liberty

COURSE CONTENT

The aim of the programme is to provide a strong foundation in coding alongside the computing knowledge and essential skills that are required for software development.

You will gain solid programming skills and a high degree of self confidence in your ability to pursue further qualifications in software engineering.

The online format and blended-learning delivery of the programme is specifically designed to enable flexible learning at a time that suits you.
