

EXPLORE YOUR

DIGITAL SKILLS

THROUGH THE
JISC DISCOVERY TOOL

THE JISC DISCOVERY TOOL

- Is a web based developmental tool that supports individual staff and students in universities to reflect on their digital capabilities
- You receive a personal visualisation report on 15 areas of digital capability when you answer a series of non-judgemental reflective questions. It takes 15 minutes to complete

WHAT IS DIGITAL CAPABILITY?

It is a term used to describe the skills and attitudes that individuals and organisations need to thrive in today's world. It covers core areas such as ICT proficiency, information data, media literacies and digital creation

SHAPE AND BUILD YOUR DIGITAL FUTURE!

BENEFITS?

- Identify your current digital strengths and explore new areas for development. Time for private reflection will help build your digital confidence within your own specific role and subject specialism
- Identify gaps and recognise where digital expertise adds value
- Discover how to build digital capability and start conversations about what makes a good digital learner
- Access a rich set of resources that will help you unlock your digital skills
- Help map digital expertise within your team or department
- Find out how your organisation can best support your digital practice. Tap into training resources at the university
- Earn a digital badge, for completion of question sets. Get support for accreditation
- Institutional access to the full version of the tool for all staff and students
