2001 NILS Data Overview Fact Sheet

This fact sheet reports on the NILS Members alive at the 2001 Census, and the level of activity associated with this group.

NILS Members - Selection into the study is based on birth date (day and month): 104 dates throughout the year were selected and, if an individual's date of birth coincided with one of these, they were included in the sample. The 2001 NILS member sample are all persons drawn from the Health Card Registration data who were considered alive at the 2001 Census date.

Census Link - If a NILS member completed a Census return in 1991, 2001 or 2011 the NILS dataset will have a Census Person and Household information for this member.

Vital Event – The events table includes; Birth (a NILS member is born), Birth to NILS dad, Birth to NILS mum and deaths. The box above shows NILS members who have experienced at least one event but NILS members can have multiple events over the course of the study period.

Migration Event – The migration events table includes; Address Change, Emigration, Immigration and Re-entrant of NILS members updated every six months from October 2001 onwards. As with vital events the box above shows NILS members who have experienced at least one event but NILS members can have multiple events over the course of the study period.
