

INTERACTIVE ACTIVITIES

Organised by our funding partner Cancer Research UK

Second Floor Seminar Room

- Come and try our hands-on activities to find out more about the ground-breaking research taking place in CCRCB (suitable for all ages)
 - Take our genetic taste test and see if you're a supertaster and learn how research is helping scientists understand the different types of cancer
 - Turn your smartphone into a microscope and see how cancer cells look different to normal cells
 - Children can design their own lab coats and look the part when they go into the labs
- ...to name but a few of the exciting activities happening on the day

POPULATION-BASED CANCER RESEARCH

Second Floor Foyer

Leveraging the power to advance population health and cancer outcomes

Hear how we research the causes, early diagnosis, survival and prevention of cancer, and service provision for affected patients

- From Belfast to Angola and Vietnam: how our research is improving cancer outcomes in low-resourced areas
- Big Data Insights from the 'UK-biobank' study including over 0.5 million participants
- Prehabilitation: supporting and preparing patients for cancer treatment

Please note:

Children must be supervised at all times. Refreshments are served on the Ground Floor. No food or drink is permitted in the laboratories.

CELEBRATING A DECADE OF ADVANCES IN CANCER RESEARCH IN BELFAST

CCRCB OPEN DAY

Saturday 17 February 2018
10.00am–2.30pm

FROM DISCOVERY TO RECOVERY

TOUR A RESEARCH LABORATORY AND MEET OUR RESEARCH TEAMS

First Floor Laboratory

MEET THE CLINICAL RESEARCH TEAM

First Floor Foyer

Representatives from the NI Cancer Trials Network and the NI Cancer Research Consumer Forum

Meet the NI Biobank team who are supporting translational research programmes

CHAT WITH REPRESENTATIVES FROM OUR LOCAL CANCER CHARITIES AND FUNDERS

First Floor Seminar Room

TALKS FROM OUR LEADING RESEARCHERS WHO ARE TRANSLATING SCIENCE INTO CLINICAL PRACTICE

Talks start at 10.30am and 12.30pm

Basement Seminar Room

Introduction to the Centre
Professor Chris Scott

Basic Science in Breast Cancer Research
Mr Stuart McIntosh

The Role of Chemistry in Drug Discovery
Dr Rich Williams

Radiation in Prostate Cancer:
Treatment with the X-Factor
Dr Aidan Cole

Life Style Approaches:
Looking forward to the future,
how we address disease
Dr Vicky Coyle
