Summary	3
Patients with pathology samples indicating cancer - All persons	6
Patients with pathology samples indicating cancer - Males	7
Patients with pathology samples indicating cancer - Females	8
Patients with pathology samples indicating cancer - Ages 0-69	9
Patients with pathology samples indicating cancer - Ages 70 and over	10
Patients with pathology samples indicating cancer - Belfast	11
Patients with pathology samples indicating cancer - Antrim	12
Patients with pathology samples indicating cancer - Craigavon	13
Patients with pathology samples indicating bowel cancer - All persons	14
Patients with pathology samples indicating bowel cancer - All persons, screening age	15
Patients with pathology samples indicating lung cancer - All persons	16
Patients with pathology samples indicating breast cancer - Females	17
Patients with pathology samples indicating breast cancer - Females, screening age	18
Patients with pathology samples indicating prostate cancer - Males	19
Patients with pathology samples indicating gynaecological cancer - Females	20
Patients with pathology samples indicating upper gastrointestinal cancer - All persons	21
Patients with pathology samples indicating head & neck cancer - All persons	22
Patients with pathology samples indicating urinary cancer - All persons	23
Patients with pathology samples indicating haematological cancer - All persons	24
Patients with pathology samples indicating malignant melanoma - All persons	25
Patients with pathology samples indicating non-melanoma skin cancer - All persons	26
Patients with pathology samples indicating other cancer - All persons	27
Notes	28

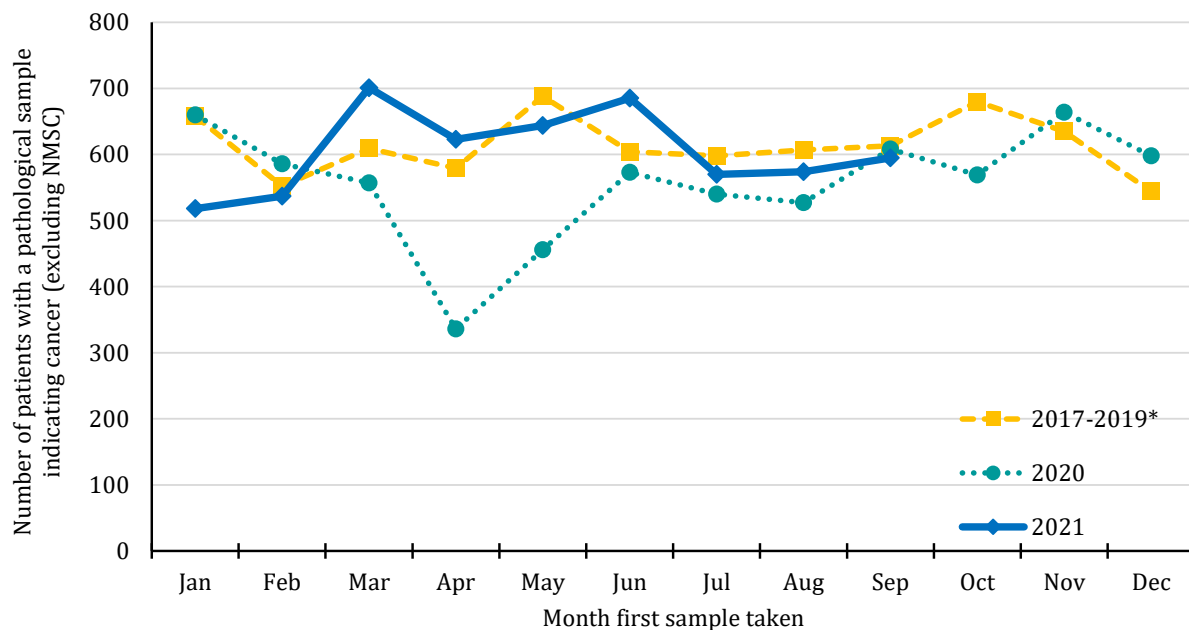

## SUMMARY

### Recent trends in the number of patients with pathology samples indicating cancer: Sep-21

- 1) This summary provides an overview of recent trends in the number of patients with pathology samples indicating cancer (excluding non-melanoma skin cancer, NMSC) whose first sample was taken from Jan-20 to Sep-21 in Northern Ireland.
- 2) These trends are contrasted with the annual average number of patients with pathology samples indicating cancer (ex NMSC) during 2017-2019 in order to provide an indication of the potential impact of the Covid-19 restrictions on diagnostic cancer services.
- 3) Data are sourced from three of the four NHS pathology laboratories in NI (Belfast, Antrim, Craigavon), which are usually provided to NICR on a monthly basis. **Altnagelvin laboratory is excluded as a change in recording systems led to an undercount in the number of reported samples in Jan-Apr 2021.**

#### Trends in patients with pathology samples indicating cancer by month and year first sample taken

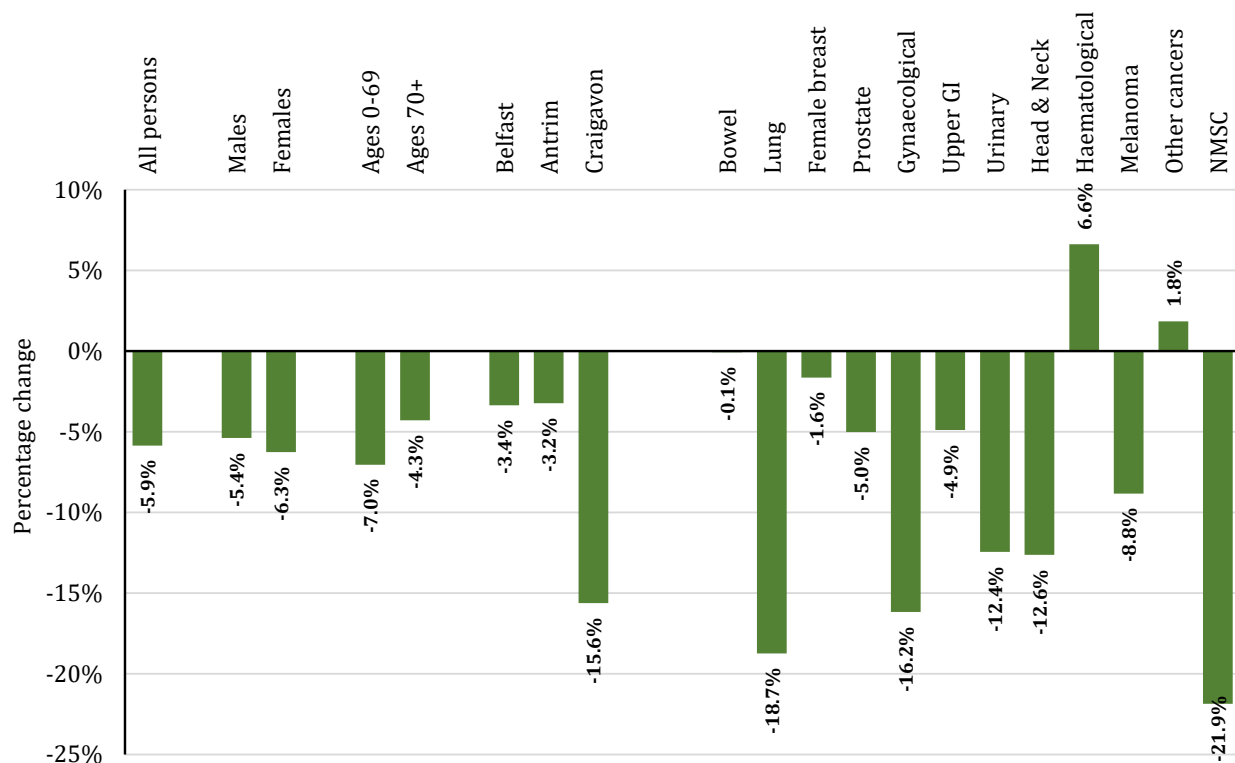

- 4) From Mar-20 to Sep-21 the number of patients with a pathological sample indicating cancer was 5.9% lower than the average number for the same time period in 2017-2019.

Year sample taken	Month sample taken											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2017-2019*	658	552	609	579	688	604	598	607	613	680	635	544
2020	660	586	557	336	456	573	540	527	608	569	664	598
2021	518	537	701	623	644	685	570	574	595			

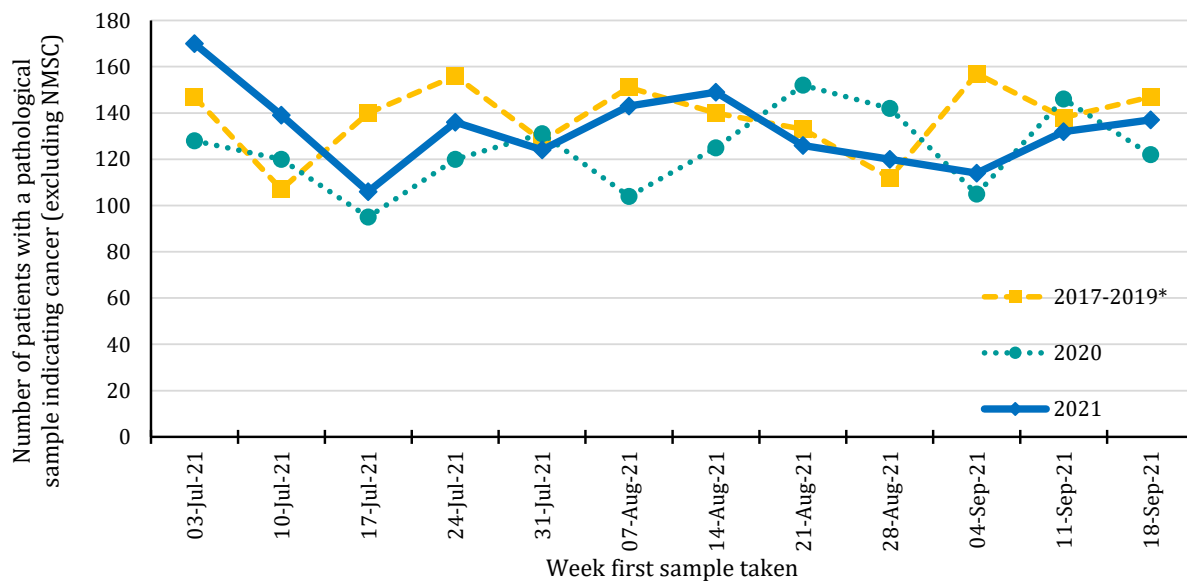

\*Annual average

- 5) From Mar-20 to Sep-21 there was a 5.4% decrease among males and a 6.3% decrease among females compared to 2017-2019. A decrease of 7.0% occurred in the number of patients aged 0-69 years, while there was a decrease of 4.3% among those aged 70 and older. Decreases were greatest in Craigavon (15.6%).
- 6) Compared to the annual average in 2017-2019, from Mar-20 to Sep-21 the number of patients with a pathology sample indicating lung cancer decreased by 18.7%, while those indicating prostate cancer decreased by 5.0%. Increases were recorded for haematological cancer, while decreases of more than 10% occurred for gynaecological cancer, head and neck cancer, urinary cancer and non-melanoma skin cancer.

**Trends in patients with pathology samples indicating cancer by week and year first sample taken**

7) There was an 3.6% decrease in the number of patients with a pathology sample indicating cancer in the twelve weeks up to 18-Sep-21 compared to the average value in the equivalent weeks in 2017-2019.

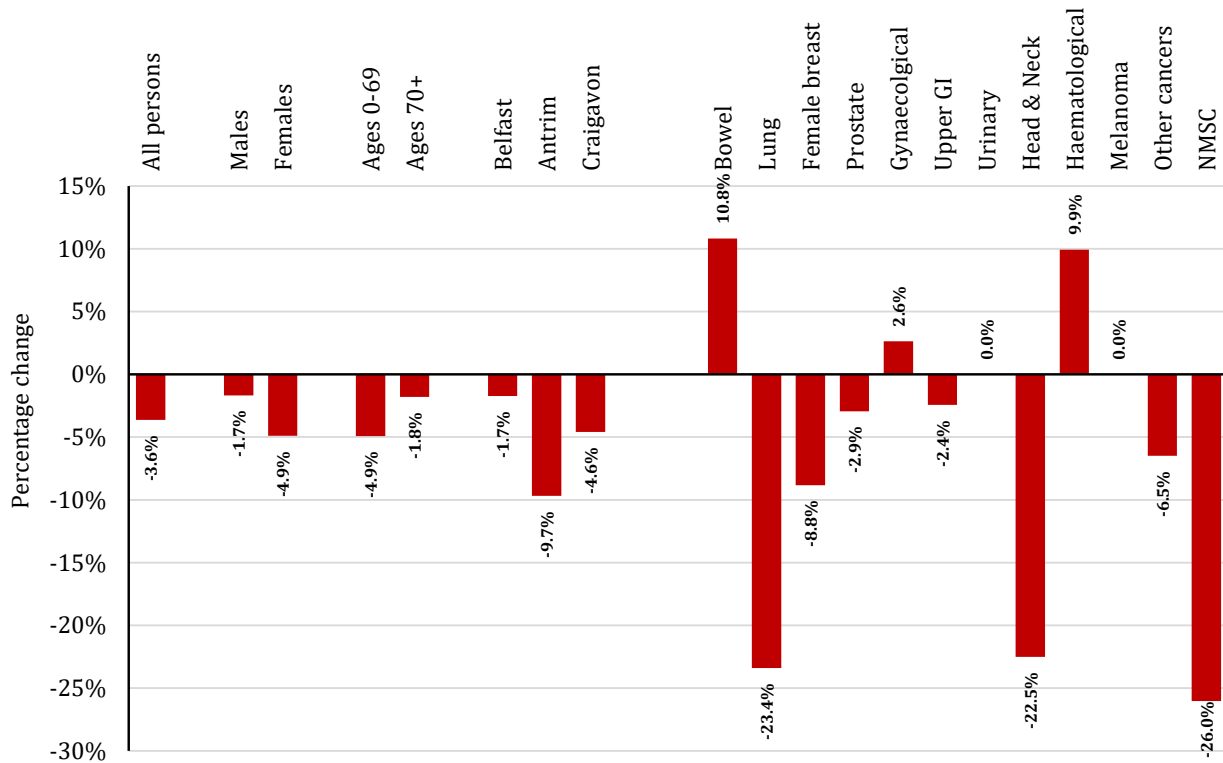

Year sample taken	Week sample taken**											
	03-Jul-21	10-Jul-21	17-Jul-21	24-Jul-21	31-Jul-21	07-Aug-21	14-Aug-21	21-Aug-21	28-Aug-21	04-Sep-21	11-Sep-21	18-Sep-21
<b>2017-2019*</b>	147	107	140	156	128	151	140	133	112	157	138	147
<b>2020</b>	128	120	95	120	131	104	125	152	142	105	146	122
<b>2021</b>	170	139	106	136	124	143	149	126	120	114	132	137

\*Annual average

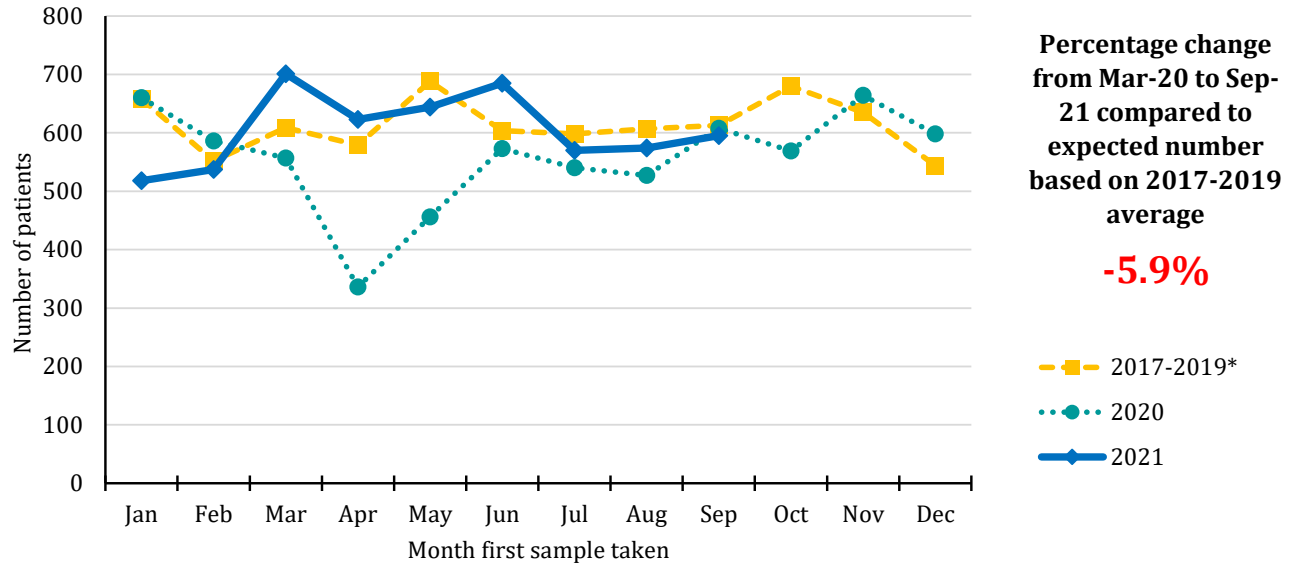

\*\* The date of the end of the week in which the sample was taken in 2021. Data for previous years refers to the equivalent Sun-Sat week in those years.

- 8) In the twelve weeks up to 18-Sep-21 there was a 1.7% decrease in male patients and a 4.9% decrease in female patients compared to the same time period in 2017-2019. A decrease of 4.9% occurred in the number of patients aged 0-69 years, while there was a decrease of 1.8% among those aged 70 and older. Decreases in the number of patients were recorded in all three laboratories.
- 9) Compared to the annual average in 2017-2019, in the twelve weeks up to 18-Sep-21 the number of patients with a pathology sample indicating lung cancer decreased by 23.4%, while those indicating female breast cancer decreased by 8.8%. Increases were recorded for bowel cancer, haematological cancer and gynaecological cancer, while decreases of more than 10% occurred for head and neck cancer and non-melanoma skin cancer.

## Notes:

1. NMSC: Non-melanoma skin cancer

2. Data is sourced from three of the four NHS pathology laboratories in Northern Ireland (Antrim, Belfast, Craigavon), which is provided to the NI Cancer Registry on a monthly basis. It does not include information on pathology samples processed by private laboratories.

3. Figures represent the number of patients with pathology samples that indicated a malignant tumour and had this result coded and recorded by the end of Sep-21. Due to potential reporting delays, pathology data from the month following Sep-21 are used in compiling the presented results.

4. Assignment of week number is based upon a Sunday to Saturday week. The week ending label used in graphs and tables is based upon the date of the end of the week (a Saturday) in 2020/2021. This is compared with the equivalent Sunday-Saturday week in 2017-2019, although the actual date ending this week in 2017-2019 will differ.

5. Individual patients with cancer may have more than one pathology sample. A diagnosis of cancer may be a result of more than one procedure indicating cancer, for example a breast cancer diagnosis may be based upon a positive biopsy of the breast and then a separate positive dissection of a lymph node. Patients are thus only included once per cancer type unless they have had pathology samples separated by more than two years, thus a patient with samples in March and April of 2019 will be counted once (in the March 2019 count), while a patient with samples in April 2017 and May 2020 will be counted in both the April 2017 and May 2020 counts.

6. Cancer types are defined as follows:

**Bowel cancer:** Includes colon, rectum and rectosigmoid junction (ICD10 codes: C18-C20)

**Lung cancer:** Includes lung and trachea (ICD10 codes: C33-C34)

**Breast cancer:** Includes female breast only (ICD10 codes: C50)

**Prostate cancer:** (ICD10 codes: C61)

**Gynaecological cancer:** Includes uterus, ovary, cervix, vulva, vagina, placenta and other female genital (ICD10 codes: C51-C58)

**Upper GI cancer:** Includes oesophagus and stomach (ICD10 codes: C15, C16).

**Head and neck cancer:** Includes lip, tongue, mouth, parotid & salivary glands, tonsil, oropharynx, nasopharynx, pyriform sinus, hypopharynx, nasal cavity, middle ear, sinuses and larynx (ICD10 codes: C00-C14, C30-C32)

**Urinary cancer:** Includes kidney, renal pelvis, ureter, bladder and other urinary (ICD10 codes: C64-C68).

**Haematological cancer:** Includes lymphoma (all types), leukaemia (all types), myeloma, malignant immunoproliferative disease and other lymphoid and haematopoietic (ICD10 codes: C81-C96)

**Melanoma:** (ICD10 code: C43)

**Non-melanoma skin cancer (NMSC):** (ICD10 code: C44)

**Other cancer:** Includes cancers of small intestine, anus, liver, gallbladder, thymus, bone, mesothelioma, soft tissue, penis, testis, eye, brain, endocrine system and thyroid (ICD10 codes: C16, C21-C26, C37-C41, C45-C49, C60, C62, C63, C69-C75). Excludes cancer of unknown primary."
