

## N. Ireland Cancer Registry Implications of Research for Services

NICR Lead Author Dr Anna Gavin <i>(Office use only)</i>
Paper ID 2016-10 <i>(Office use only)</i>
Date Submitted to NICR Steering Group 14/11/2016 <i>(Office use only)</i>

<b>Paper Title</b>	A Systematic Evaluation of Patient-Reported Outcome (PRO) Protocol Content and Reporting in UK Cancer Clinical Trials: the EPiC Study Protocol.
<b>Authors</b>	Ahmed K, KyteD, Keeley T, Efficace F, Armes J, Brown JM, Calman L, Copland C, Gavin A, Glaser A, Greenfield DM, Lanceley A, Taylor R, Velikova G, Brundage M, Mercieca-Bebber R, King MT, Calvert M.
<b>Journal</b>	BMJ Open 2016;6:e012863
<b>DOI</b>	doi:10.1136/bmjopen-2016-012863
<b>Funders</b>	Macmillan Cancer Support Grant Number 15200586
<b>Full paper available online</b>	YES <input checked="" type="checkbox"/> NO <input type="checkbox"/> NOT YET <input type="checkbox"/>
<b>Conclusion</b>	The protocol for a study planning to identify how patient reported outcomes are included in UK clinical trials - Dr Gavin a co-author as member NCRI Psychooncology group.
<b>What this means for the service</b>	Patient reported outcomes are increasingly recognised as important for patients and health services.
