N. Ireland Cancer Registry Implications of Research for Services

NICR Lead Author

Paper ID (Office use only) Date Submitted to NICR Steering Group Click here to enter a date. (Office use only) Paper Title Knowledge or noise? Making sense of General Practitioners' and Consultant use of 2-week-wait referrals for suspected cancer Donnelly, C., Hart, N., McCrorie, A. D., Anderson, L., Donnelly, M., Murchie, P., & Gavin, A Journal British Journal of Cancer DOI https://doi.org/10.1038/bjc.2017.213, Funders National Awareness and Early Diagnosis Initiative Full paper available online YES NO NOT YET Conclusion This paper analysed data from the MDT Cancer Patient Pathway System on 185,000 referrals and 29,000 cancers to determine how emergency referrals of cancer patients from general practice and consultant upgrades of routine referrals with suspected cancer affected the detection of cancers. What this means for the service Previous work identified metrics as evidence of good quality. However this work indicates that the findings from previous work are due to random variation and have no basis in fact.		(Office use only)
