

Catherine McCloskey

Lecturer Mechanical Engineering

Catherine McCloskey

**BEng Mechanical Engineering; MEng Mechanical and Manufacturing Engineering
Master of Business Administration (MBA)
Post Graduate Certificate in Education (P.G.C.E)**

On graduating from Queen's in 1993, I worked in the capacity of a Mechanical Engineer with the global diesel generator company, F.G. Wilson Engineering (Caterpillar), gaining extensive experience of the energy generation and distribution industry. Several years later I joined Dundalk Institute of Technology as a lecturer in the School of Electronic and Mechanical Engineering where I currently specialise in lecturing and research in the Energy, Energy Policy and Economics, Business sustainability and Innovation fields.

Throughout my career I have actively pursued research links and collaboration with industry and advocate the need for education to work closely with industry, enterprise and the public sector. More importantly, I am also married to Sean and mother to two girls Aoife and Niamh!

The most effective way to do it, is to do it.
- Amelia Earhart
