

MSc Cystic Fibrosis Scholarship (MSc Experimental Medicine)

This new Scholarship presents an exciting new opportunity to enter a prestigious new MSc programme in Queen's University Belfast.

The scholarship, to the value of £6,500, is open to applicants wishing to undertake the MSc in Experimental Medicine and will be used towards tuition fees with any remaining balance used to provide a small stipend. The successful applicant will undertake a Cystic Fibrosis related project in the Centre for Experimental Medicine.

Terms of Scholarship and Eligibility

- This scholarship is open to students wishing to undertake the MSc in Experimental Medicine in the area of cystic fibrosis research in the Centre for Experimental Medicine.
- The Award is open to applicants with minimum upper second class honours degree.
- Academic background of the candidates will be taken into consideration along with the 300 word application. Evidence of equivalent professional qualifications (MBBS, BDS or BVSc) or experience will be considered on an individual basis.
- If no suitable candidate is identified then the award may be deferred until the following year. The Donor is to be made aware should this situation arise.
- The donor will be invited along to the student presentations and will receive a summary of the research findings.
- Applications are welcome from Home, EU and International candidates
